

## ScerIS Grant Funding Services

*ScerIS provides not-for-profit and for-profit organizations with success based grant funding services. Other than a stipend deposit, no fees are collected until there is a successful conclusion and grant funds are secured by our clients.*

*Services are provided to hospitals, human services organizations, social services organizations, trade associations, registered charities, foundations, and research and scientific organizations.*

### Fund Raising Services *Process Makes The Difference*

Before accepting a grant writing assignment, our process begins with an understanding of your requirements and we conduct research to identify potential funding sources. If real opportunities are found, we compare your needs with the missions and giving criteria of foundations or with other private and government funders that most closely match your needs. This process eliminates the time and resources spent on filing grant applications with funders who don't support your mission. Instead, we prepare and submit your grant requests only to those funders found to be most interested in working with you.

Once one or more matches are identified, a business plan model is used to prepare grant applications. Your organization's goals, objectives and strategies will be included as well as a thorough, yet concise, statement of need. Project timelines, key performance indicators, targeted constituencies, staffing and resources will also be part of the package. Very important to the grant application process is developing relationships with grant administrators. ScerIS can provide advice to guide in building relationships or can act on your behalf and work directly with the administrators.

**This is a process that gets results because it is highly targeted.**
