ETCETERA
Accelerate Enterprise Performance

TECHNOLOGY PLATFORM FOR ENTERPRISE-WIDE TRANSFORMATIONAL CHANGE

ETCETERA® (ETC®) is transformational. It's a disruptive, fourth generation software platform that strengthens growth and profitability by accelerating enterprise performance.

ETC® helps business leaders fulfill their desire for fewer vendors, fewer applications to support, a reduced risk of malware and ransomware attacks and an increased responsiveness to business needs. Beyond ERPs, EMRs and other primary applications, ETCETERA® is the platform for everything else.

As a platform for change, ETC® helps organizations avoid the inevitable delays of getting applications in place when budget cycles, capital approval processes or operating spending approvals do not or cannot support organizational needs and anticipated improvements.

Built on a foundation of extraordinary performance, ease of use, security and scalability, ETC® helps organizations meet today's needs and reach tomorrow's vision.

Etcetera... Etcetera…... ETCETERA®.

KICK LEGACY APPS TO THE CURB

ETC® provides the platform to simplify, consolidate and eliminate legacy applications while enabling innovation for the enterprise. This significantly reduces:

- Support efforts and support costs
- Application maintenance costs
- Exposure to malware and ransomware
- Infrastructure footprint
- Infrastructure replacement capital costs
- and more

WHY ETCETERA®?

Because IT and senior leadership want integrated solutions and can no longer deal with the increasing costs and limitations of disparate silos of technology.

Executives, managers and employees alike require swift, reliable and secure access to information and work processes. ETCETERA® can provide clear, concise, protected visibility and access to information anywhere in the enterprise from any location - in the field, at the office or from home.

UNLIMITED EVERYTHING

Get more accomplished with less cost and less effort. You have ERP, EHR, HRIS and Payroll systems. ETCETERA® is for everything else.

- **Unlimited** Named Users
- **Unlimited** Applications

- Unite Disparate Data Sources

Enterprise Data Warehouse
Normalized, Standardized, Accessible

BENEFITS OF ETCETERA®

ETC® simplifies, consolidates, modernizes and integrates business applications and management information. It provides a single platform designed to accommodate the unique requirements of every business.

Control: organizations are in control of application development and process improvement.

Quality: applications are designed to meet exact requirements.

Velocity: many applications are deployed in minutes or hours.

ROI: achieved in weeks or months.

Leverage: create and replace any number of applications for the price of one.
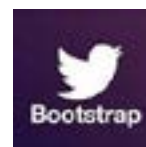

Productivity: immediately increase employee productivity.

Disaster Recovery: eliminate ad hoc systems and support requirements.

ETC® is the answer to dozens of issues plaguing organizations of all types. It's the platform for unlimited development and deployment of integrated solutions and provides for the simplification of IT while helping organizations achieve and adjust to ever changing data security and privacy requirements.
